# OM (orchestra model)

OM stands for "orchestra model" and was originally a larger sized guitar for strong projection on stage to measure up with the contemporary louder brass ensembles. Since the introduction of the large Dreadnaught model, the OM is nowadays of less stature and considered as the finger pickers top choice. The OM model has grown tremendously in popularity during the last years due to its articulate yet powerful voice, its attractive size and extremely comfortable playing.

## Standard configuration

<b>Type/model:</b>	<b>OM Steel string or OM Nylon Cross-over</b>
<b>Neck:</b>	25.34" (645 mm)
